Packaging and converting ERP

eProductivity Software

STIMULATE PROFITABLE DECISION MAKING!

As a business leader and entrepreneur, you're constantly looking for ways to improve your products and processes. Chances are, you're looking for a strategic partner with the same level of focus and commitment that you've put into your business.

eProductivity Software Radius® has been the label and packaging industry's leading enterprise resource planning (ERP) and end-to-end enterprise management solution for over three decades. This robust software is 100% focused on improving business and production operations for labels, folding cartons, and flexible packaging products. Unlike any other solution, eProductivity Software Radius brings you the level of visibility and intelligence you need to stimulate profitable decision making.

An ERP software system is the blood that runs throughout an organization. The right system connects information, technology, and people, ensuring the business keeps moving forward. Finding the right partner with proven industry-specific solutions can be the difference between creating positive change and becoming an industry leader, or standing still and potentially falling behind.

At eProductivity Software, we are driven by the needs, feedback, and vision of our customers. We believe that our commitment to excellence, our customer-centered philosophy, and our industry-leading solutions are the reasons packaging and printing leaders rely on eProductivity Software as their long-term strategic partner.

“ Over time our variances on the production cycle have continued to decrease as we have fine-tuned our operations to maximize our processes. ”

Tim Burri, Controller
Amcor Flexibles Yuba City

“ You have information at your fingertips that you normally wouldn't have...

Radius is how you get the job done. ”

Lisa Glenn, Customer Service Lead
Colbert Packaging

A solid foundation and proactive approach

As jobs move through your business, every transaction is collected, organized, and presented in a usable format by eProductivity Software Radius. The system promotes accessible information and brings data to life, so your people and processes are able to function at a higher level.

Consolidating operational information into one centralized system

eProductivity Software Radius helps you streamline operations, improve resource management, reduce waste, and boost productivity. Business leaders are able to transition to a more proactive management approach — optimizing and maximizing day-to-day and long-term performance.

Industry-focused and configurable

eProductivity Software Radius has been developed specifically for the packaging and label converting industries. This means you don't have to deal with the costly, ongoing customizations often associated with generic software packages. By running standard versions of this flexible ERP system, eProductivity Software customers enjoy easier upgrades, better service from a team that knows the industry, a lower total cost of ownership, and the competitive advantage of being able to quickly capitalize on new growth opportunities.

Scalable to protect your investment

The eProductivity Software Radius solution's architecture allows single-facility companies to run the same system as large, global organizations that require the flexibility of multi-company, multi-plant, multi-language, and multi-currency capabilities.

Supporting you today, engineering for tomorrow

eProductivity Software Radius has been implemented in hundreds of leading packaging and label converting enterprises around the globe. eProductivity Software tested and proven implementation process, which includes individual project attention by a skilled implementation and training team, helps our customers to hit the ground running.

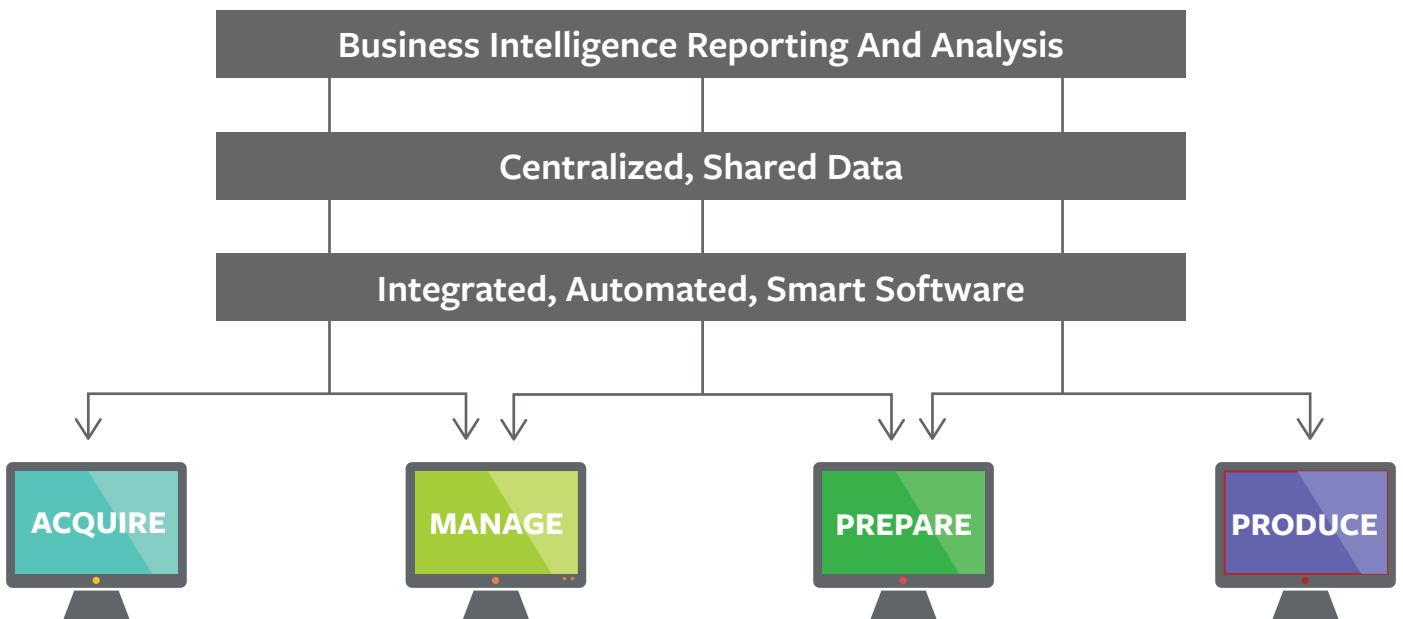

Our focus is not limited to software; we live and breathe print and packaging productivity. We listen to our customers and the industry, and continually evolve our solutions to meet your needs today, whilst engineering for the future. Our tools provide your business with a profitable, future-proof management and production ecosystem.

“ eProductivity Software Radius allows us to respond quickly to customers and utilize the most efficient means of running each project across whichever plant capabilities best meet the needs of the job. ”

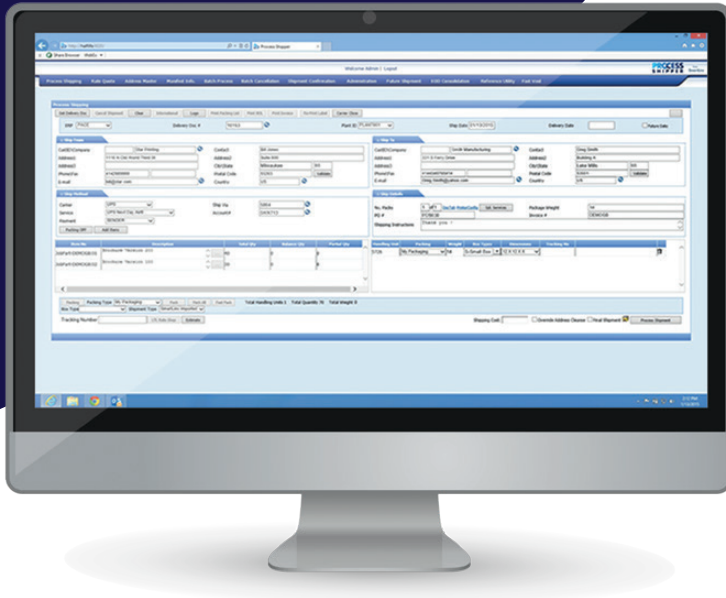

Greg Myers,
CIO, Multi-Color Corporation

Fuel an end-to-end ecosystem

eProductivity Software Radius connects all parts of your enterprise. Tight integration with other eProductivity Software components and third-party solutions allows you to configure a single, integrated business and production ecosystem.

Powerful business intelligence

As an extension of the core eProductivity Software Radius ERP solution, Business Intelligence (BI) promotes continuous improvement within your organization — positioning you for success and growth. BI provides company leaders and managers with enterprise-wide visibility into things happening right now, as well as trends that are developing or have developed over time.

Armed with clearly presented information in an intuitive user interface, decision makers are able to discover the areas of their business that require attention. Powerful ‘what-if’ scenario generators and drill-down capabilities make complex decisions easier. Data comes to life with BI — providing true interaction between information, technology, and people to ensure your business continues to drive forward.

Build a smarter, more unified organization

eProductivity Software Radius connects people, processes, and technology with automated, smart software. information

- Sales people gain mobile visibility into accounts, opportunities, and plant operations. Their productivity increases and their clients enjoy better service.
- Executives gain the tools they need to manage more proactively. Critical decisions are made based on accurate information, inefficiencies are addressed before resources are consumed; revenue drivers and new opportunities are identified in time to capitalize on them.
- Managers make quicker decisions based on live updates from the shop floor and other triggered system communications. Constantly shifting priorities are handled more effectively.
- Production employees work smarter and more efficiently with continuously updated, prioritized work lists and accurate information about jobs and availability of materials.

Ultimately, eProductivity Software solutions for integration, automation, efficiency, and visibility provide you with the knowledge and tools to achieve your goals, and strategically position your business for the future.

The decision to partner with eProductivity Software, the packaging, converting and printing industry's leading technology innovator, is why our customers are leading the industry today and will continue to lead in the future.
