Escada
CLARITY

Take **quality** and **productivity** to the next level

eProductivity Software

Tracebility
and analysis

Clarity incorporates data from all Escada control systems, making it easier than ever to oversee the entire operation.

Each Escada product has been developed to communicate as much information as possible, which enables you to analyse detailed findings through this clear and easy to use data reporting system.

Bring Clarity with our new management interface, with all of your data presented in an intuitive and unique format. Clarity allows you to perform efficient and rapid analysis. It is completely customisable, allowing you to manage your data according to your needs and schedule your data analysis with automated production of custom reports.

SEE THROUGH THE DATA CLOUD

Clarity brings together all production information in a user-friendly interface. It drastically reduces the challenges and duration of data analysis.
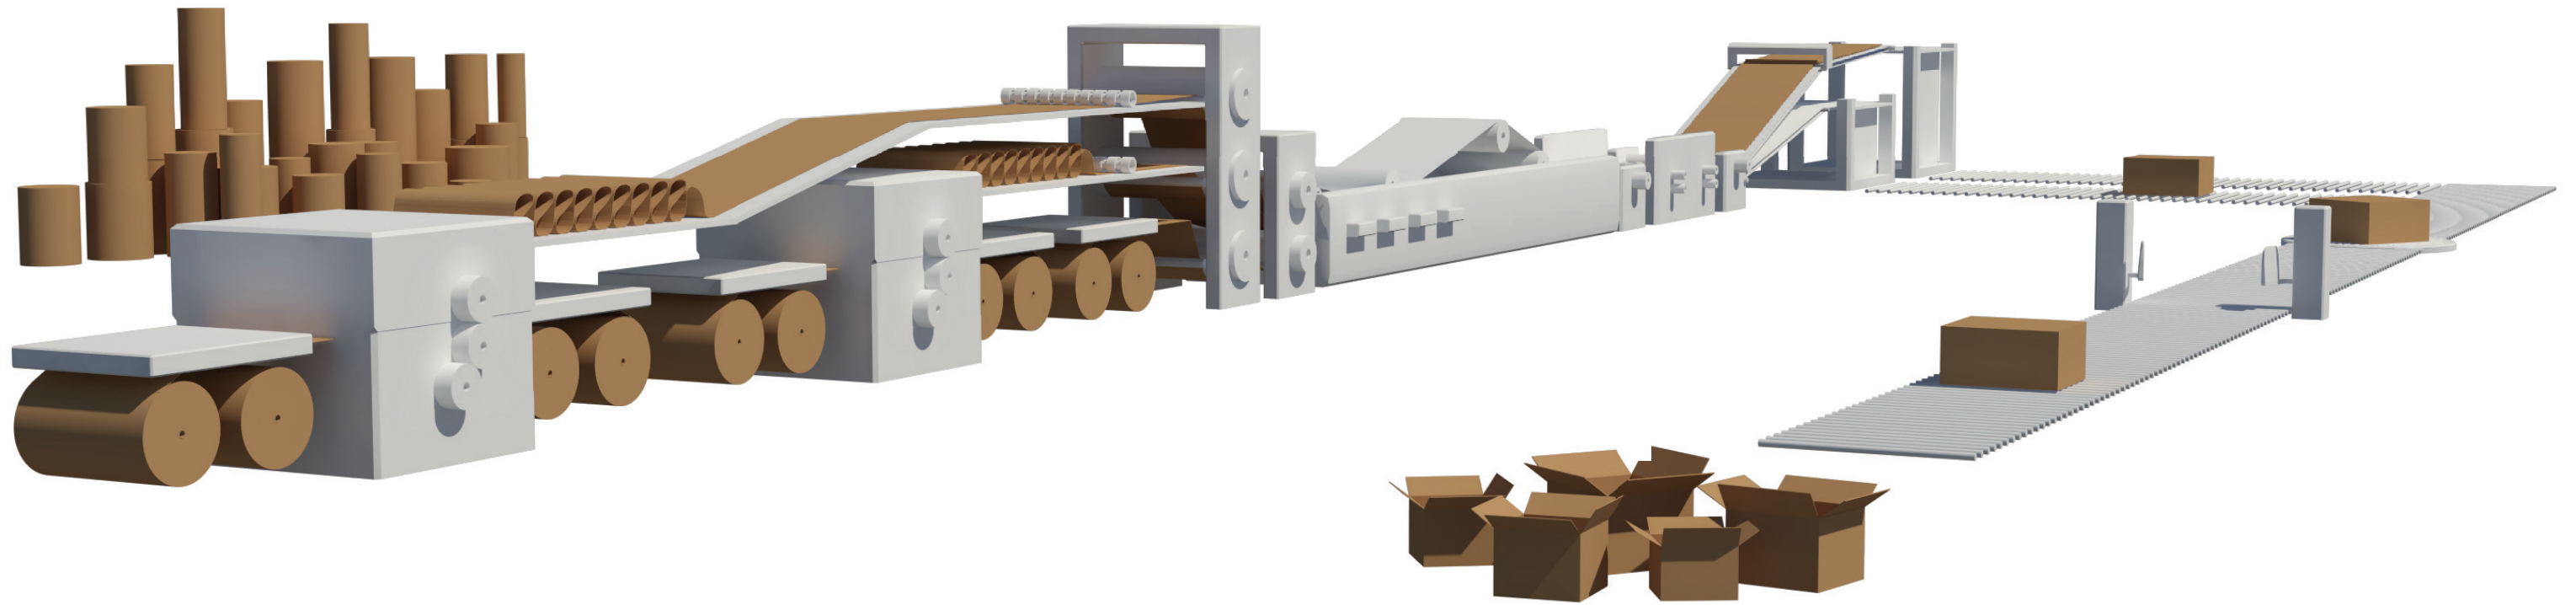

TRACK YOUR KEY PARAMETERS

Monitor your production by using the Clarity Dashboard which eases the tracking of your key parameters. Look at speed, waste, warp and sensors, and chart these measurements in an instant to evaluate your process.

PRODUCE BESPOKE REPORTS

In addition to the standard reports integrated into Clarity (e.g. OEE report, summary of waste and many more), you can also create bespoke reports to perfectly fit your needs.

Perfect Board **Everytime**

Escada's innovative products offer plant-wide solutions, perfectly placed to maximise the potential of your operation. Our systems are designed in a modular fashion, and will interface with any other machines or control systems, allowing you to build with Escada from the bottom, right the way through to a complete solution.

SYNCRO 7
Perfect Harmony. Maximum Performance.

PROFILE
Maximise your productivity and profits.

CLARITY
Traceability & analysis.

OPTIMA
Unique & efficience paper management.

WEB BASED TECHNOLOGY

- Latest web-based technology platform
- No local PC installation required
- Make changes remotely and globally
- Automatic data refresh
- Simple user admin requirements

GROUP-WIDE REPORTING

- New intuitive dashboard
- Multiple machine reporting
- Multiple plant capability
- Highly configurable targeting
- Highly visual data insights

INCREASED DATA CONTENT

We've added more data to the Next Gen Clarity specially to focus on process recipe analysis.

- New intuitive dashboard
- Multiple machine reporting
- Multiple plant capability
- Highly configurable targeting
- Highly visual data insights

Customer
Service

Escada off ers comprehensive support packages for all of our products. Our dedicated support team is on-hand 24 hours a day, 7 days a week, committed to providing excellent after sales care and giving you the reassurance that assistance is only a call away.

Our customer service department also incorporates a specialist training team who will deliver training at every step of the installation process with courses that can be tailored to meet your requirements.
